### **BOARD'S STATEMENT**

#### Dear Stakeholders,

The Board of Directors (the "Board" or "Directors") of KOP Limited ("KOPL" or the "Company", together with its subsidiaries, the "Group") is pleased to present the Group's sustainability report (the "Report") for the financial year ended 31 March 2025 ("FY2025"). Through this Report, we reaffirm our unwavering commitment to fostering a sustainable future while driving long-term business growth. We continue to strengthen our sustainability initiatives, striving for continuous improvement in our environmental, social and governance efforts.

As a company operating in both the property and hospitality sectors, KOPL endeavours to expand its business and solidifying its position as a trusted global leader. Alongside our growth, we remain dedicate to creating positive societal impact, upholding human rights, minimising our environmental footprint, and promoting ethical and responsible business practices. To achieve this, we incorporate Economic, Environmental, Social, and Governance ("EESG") considerations into our business strategy and day-to-day operations. Additionally, we focus on enhancing our capabilities and value propositions to safeguard the interests of our stakeholders.

The Group recognises the challenges in embedding sustainability into its operations, particularly in managing climate-related risks, regulatory compliance and rising costs of raw materials. Nevertheless, we recognise significant opportunities for progress. To enhance our environmental stewardship, the Group has adopted water and energy-efficient fixtures and fittings, energy-saving LED lighting, and promote recycling and digitalisation initiatives across our operations.

Our Sustainability Steering Committee ("SSC") plays a vital role in overseeing and updating the Board and Management about the Group's sustainability policies, strategies, and initiatives. The SSC conducts annual materiality to reaffirm key sustainability topics and align them with our strategic direction. As we advance in our sustainability journey, we will continue refining our performance indicators and targets to align with our business objectives. Furthermore, we remain committed to strengthening stakeholder engagement, fostering greater transparency and enhancing our sustainability practices to build a resilient, future-ready organisation.

We are pleased to share with you our sustainability report and invite you to read about our latest progress and achievements over the past year. Thank you for your continued support, and we look forward to creating even greater value for our stakeholders in the year ahead.

Ms. Ong Chih Ching Executive Chairman and Executive Director

**KOP Limited** 

### **ABOUT THE GROUP**

KOP Limited ("KOPL" or the "Company", together with its subsidiaries, the "Group") (Stock Code: SGX:5I1) is more than a community of property development companies: we have a proven track record of excellence in everything we do. We excel in real estate investment, maintaining an eclectic portfolio of strategic assets and we make strides in the economy of place, developing, maintaining, operating and managing apartment buildings and hospitality businesses through KOPL, in which it constitutes the principal investor.

In the tourism industry, where service excellence is the definitive gold standard, we embody the epitome of Asian hospitality. Montigo Resorts combines advanced technologies and thoughtfully considered design elements with concern for the particularities of local cultures and histories to create premium experiences for a diverse age demographic. At KOPL, we do not believe ambition should have a ceiling.

We build your dreams.

### **ABOUT THIS REPORT**

#### Scope of Report

This annual publication of our sustainability report ("**Report**") summarises the Group's performance, initiatives, and impact of its operations in the aspects of key Economic, Environmental, Social and Governance ("**EESG**") areas. This Report focuses on the EESG performance of our hospitality business in Indonesia – Montigo Resorts in Nongsa ("**MRN**") and Montigo Resorts in Seminyak ("**MRS**"), along with the Employee Accommodation at Batam, Indonesia.

Unless otherwise stated, the same approach used in our Financial Statements is also used to consolidate sustainability information and is consistently applied across our reporting boundaries and material topics. All information, statistics and targets presented in this Report aligns to the Group's financial reporting period from 1 April 2024 to 31 March 2025 ("FY2025"). We have excluded Montigo Resorts in Somerset due to challenges in the data collection and we will include it in the future sustainability reports.

#### **Reporting Standards and Framework**

This Report has been reviewed by the Board and was prepared in line with the sustainability reporting requirements of Rules 711A and 711B of the Listing Manual Section B: Rules of Catalist ("Catalist Rules") of Singapore Exchange Securities Trading Limited ("SGX-ST"), and the guidance set out in SGX-ST's sustainability reporting guide under Practice Note 7F of the Catalist Rules.

This Report complies with the climate-related requirements of the IFRS Sustainability Disclosure Standards ("IFRS SDS"). The IFRS SDS issued by the ISSB – comprising IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information ("IFRS S1") and IFRS S2 Climate-related Disclosures ("IFRS S2") – provide a comprehensive framework for sustainability disclosures focused on the needs of investors and financial markets. The Report was also prepared with reference to the Global Reporting Initiative ("GRI") Standards as it is a globally recognised and widely adopted framework, which enables the Group's stakeholders to compare its sustainability performance against its industry peers.

The IFRS SDS builds on the recommendations of the Task Force on Climate-related Financial Disclosures ("TCFD") framework. They aim to establish a comprehensive global framework for sustainability-related financial disclosures, addressing the needs of capital markets and the demand for consistent, comparable, and verifiable information regarding the exposure to, and management of, sustainability-related risks and opportunities. This year marks the Group's first adoption of IFRS SDS for climate-related disclosures.

The content of this Report was defined by the four reporting principles established by GRI Standards: (1) Stakeholder Inclusiveness; (2) Sustainability Context; (3) Materiality; (4) Completeness. The Stakeholder Inclusiveness principle was implemented in determining the Report context through various stakeholder engagements and internal discussions. The Sustainability Context principle was implemented in determining the Report context which covered the EESG aspects. The Materiality principle was implemented in determining the Report context through stakeholder engagements and internal discussions. The Completeness principle was implemented by ensuring that this Report covers all relevant topics relevant to the Group's EESG impacts.

Pursuant to the Rule 720(6) of the Catalist Rule, the Group complies with the requirement for Directors to undergo mandatory training. As at the date of this report, all Directors have completed sustainability training courses as prescribed by the SGX-ST.

#### Restatement

There were no restatements made from the previous report.

#### Internal Review and External Assurance

In compliance with the Catalist Rule 711B on sustainability reporting, the Group has engaged its internal auditor, Baker Tilly Consultancy (Singapore) Pte. Ltd., to conduct an internal review of its sustainability reporting processes to ensure their adequacy and effectiveness. Where applicable, the review has further strengthened the Group's risk and governance processes, internal controls, and systems. The Group has not sought external assurance for this reporting period but may consider doing so in the future.

#### **Report Content & Quality**

This Report aims to provide an integrated overview of the Group's initiatives and strategies related to sustainability and responsible business development. This Report intends to address the key concerns and issues that KOPL's stakeholders face. To ensure content quality, we have applied GRI's principles of accuracy, balance, clarity, comparability, reliability, and timeliness as well as TCFD's seven principles for effective disclosure, including disclosures should represent relevant information; be specific and complete; be clear, balanced and understandable; be consistent over time; be comparable among companies within a sector, industry or portfolio; be reliable, verifiable and objective; and be provided on a timely basis.

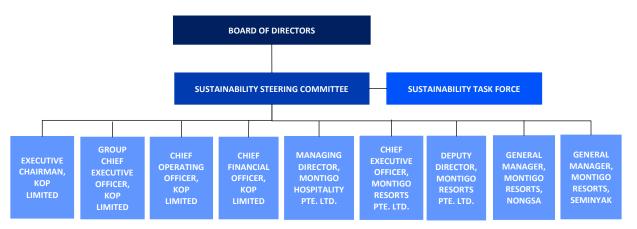

#### **Contact Us**

As part of our continuous efforts on improving the coverage of our sustainability practices in the Report, we welcome stakeholders to submit their questions or feedback on any aspect of our sustainability performance to <a href="mailto:enquiry@kopgroup.com">enquiry@kopgroup.com</a>.

### **SUSTAINABILITY GOVERNANCE**

At KOPL, we recognise the importance of a robust sustainability governance framework in upholding accountability and transparency. The Board acknowledges that sustainability is essential for ensuring the long-term success of KOPL's business. We work closely with the Group's sustainability leadership and working teams to achieve our objectives.

Our SSC, supported by our Sustainability Task Force ("STF"), plays a key role in shaping and implementing the Group's sustainability policies and practices. The SSC oversees and assesses the Group's overall sustainability performance, ensuring alignment with our strategic goals. The structure of our sustainability governance is illustrated below:

The SSC provides leadership on the Group's sustainability agenda, providing regular updates to the Board and management on sustainability strategies and initiatives. Additionally, the SSC is responsible for reviewing and evaluating the Group's sustainability goals and performance. It conducts annual assessments of sustainability policies to identify areas for improvement and drive continuous progress. The table below outlines the key roles and responsibilities within the SSC, demonstrating the collective effort in advancing sustainability across the Group.

|  | Roles  | Responsibilities  |  |
|--|--|---|--|
| Executive<br>Chairman, KOP<br>Limited            | <ul> <li>Oversees the Group's strategic<br/>formulation and vision on<br/>sustainability agenda</li> <li>Support to foster a culture of<br/>sustainability across the<br/>Group</li> </ul> | formulates the Group's sustainability strategy  f • Evaluates EESG risks and monitor  |  |
| Group Chief<br>Executive Officer,<br>KOP Limited | <ul> <li>Oversees the Group's plans<br/>and approves its strategies,<br/>metrics, and targets to<br/>address its climate-related<br/>risks</li> </ul>                                      | <ul> <li>Identifies and evaluates climate-related<br/>risks and opportunities</li> <li>Reviews climate-related metrics and<br/>targets</li> </ul>   |  |
| Chief Operating<br>Officer, KOP<br>Limited       | <ul> <li>Member of the SSC to support<br/>sustainability practices</li> <li>Support to foster a culture of<br/>sustainability, across all<br/>departments</li> </ul>                       | <ul> <li>Manages day-to-day operations pertaining to ESG performances of the Group</li> <li>Oversees daily administrative and operational functions related to sustainable development</li> </ul> |  |

|   | Roles  | Responsibilities  |  |
|---|--|---|--|

Ltd.          | <ul> <li>Member of the SSC to support sustainability practices</li> <li>Ensure the collection of climate-related data are in accordance with the metrics, of good quality and per relevant regulations</li> <li>Conduct trainings across departments to create awareness on the importance and value of ESG performance</li> </ul> | climate-related data are compiled and maintained in good quality and in accordance with relevant regulations  Coordinates reporting and disclosures  ceres ceres ceres compiled and maintained in good quality and in accordance with relevant regulations  coordinates reporting and disclosures |  |
| General Manager,<br>Montigo Resorts,<br>Nongsa            | <ul> <li>Member of the SSC to support<br/>sustainability practices</li> <li>Support to foster a culture of<br/>sustainability, especially<br/>across MRN</li> </ul>  | <ul> <li>Promotes recycling practices and cultivate sustainability habits across MRN</li> <li>Works closely with the SSC to assess and manage climate-related risks and opportunities from MRN</li> </ul>   |  |
| General Manager,<br>Montigo Resorts,<br>Seminyak          | <ul> <li>Member of the SSC to support<br/>sustainability practices</li> <li>Support to foster a culture of<br/>sustainability, especially<br/>across MRS</li> </ul>  | <ul> <li>Promotes recycling practices and cultivate sustainability habits across MRS</li> <li>Works closely with the SSC to assess and manage climate-related risks and opportunities from MRS</li> </ul>   |  |

Pursuant to the Rule 720(6) of the Catalist Rule, the Group complies with the requirement for Directors to undergo mandatory training. All Board of Directors have completed sustainability training courses on ESG Essentials and Sustainability E-Training for Directors offered by the Singapore Institute of Directors and Institute of Singapore Chartered Accountants respectively.

### STAKEHOLDER ENGAGEMENT

The Group recognises the importance of regular and transparent engagement with stakeholders to understand their expectations, address their concerns, and identify key material EESG issues. We are committed to fostering strong, lasting relationships with our stakeholders by actively considering their perspectives in our decision-making processes.

Both internal and external stakeholders play a vital role in our sustainability journey. To ensure meaningful engagement, we connect with them through various platforms and feedback channels. By maintaining an open dialogue, we drive positive impact, align our sustainability initiatives with stakeholder expectations, and support our long-term business objectives.

The following table summarises our key stakeholder groups, engagement methods, and frequency of engagement as well as key topics of interest:

| Key<br>Stakeholder               | Engagement Methods   | Frequency   | Key Topics of Interest   |
|----------------------------------|--|---|--|
| Investors<br>and<br>Shareholders | Timely and transparent updates of financial results and announcements, business developments, press releases, and other relevant disclosures via SGXNET and KOPL's website                                     | Throughout<br>the year  | <ul> <li>Long-term sustainable distribution and total returns</li> <li>Transparent reporting</li> <li>Sound corporate governance practices</li> </ul>  |

| and<br>Regulators                | Meetings and dialogue sessions   | the year  | updates on changing laws and regulations   |

### SUSTAINABILITY COMMITMENTS AND APPROACH

#### **Sustainability Framework**

The Group's sustainability framework is structured to address each EESG relevant to our business. From these components, the Group identifies topics material to our operations ("Material Topics"), enabling the development of a sustainability approach that is integrated with our business activities. This Report explores the following Material Topics:

|             | KOPL's Material Topics                          |  |
|-------------|---|--|
| Environment | Greenhouse Gas Emissions and Energy Consumption |  |
|             | Water consumption                               |  |
| Social      | Talent Attraction and Retention                 |  |
|             | Training and Education                          |  |
|             | Occupational Health and Safety                  |  |
|             | Employee Benefits and Wellness                  |  |
|             | Community Involvement                           |  |
|             | Customer Health and Safety                      |  |
| Governance  | Compliance with Laws and Regulations            |  |
|             | Ethics and Business Conduct                     |  |
| Economic    | Economic Performance                            |  |

KOPL is dedicated to fostering the sustainable development of its business while making a positive impact on the environment and the communities in which we operate. Our sustainability approach is guided by our material topics. The Group fulfils these commitments by assessing and managing the impacts associated with the sustainability issues most relevant to our operations.

#### **Materiality Assessment**

At KOPL, we conduct an annual materiality assessment to evaluate the sustainability topics relevant to our business operations and stakeholders. This materiality assessment is carried out with oversight from the Board, SSC and STF and considers the following:

- Identification of sustainability issues that matter to our stakeholders and have the most significant impact on our business, the economy, the environment, and people, including human rights consideration, in line with the GRI Standards;
- Peer benchmarking to understand industry best practices;
- Review of ESG developments within Singapore's sector to assess potential impacts; and
- Identifying risks and opportunities associated with each material topic.

As part of this process, we have reassessed the material topics through internal discussions and stakeholder consultation, as well as in response to the external business climate emerged in FY2025. The insights gained from this assessment help shape the Group's sustainability strategy, initiatives and goals, ensuring that they remain relevant and impactful. This approach involves the following steps:

| Identification   | Assessment   | Prioritisation  | Validation  | Review   |
|--|--|---|---|--|
| <ul> <li>Background<br/>research<br/>including<br/>stakeholders'<br/>interests and<br/>sector-specific<br/>concerns</li> </ul> | <ul> <li>Assess the pervasive issues across the Group</li> </ul> | <ul> <li>Prioritise<br/>salient<br/>sustainability<br/>issues based on<br/>their likelihood<br/>and severity</li> </ul> | <ul> <li>Validation of<br/>material factors<br/>and<br/>performance<br/>metrics by the<br/>Board</li> </ul> | <ul> <li>Seek feedback<br/>from<br/>stakeholder on<br/>this report to<br/>review material<br/>topics for next<br/>reporting cycle</li> </ul> |

Based on the assessment above, KOPL identifies the actual and potential economic, environmental and social impacts of each sustainability topic. These topics are further assessed based on their severity and likelihood, allowing the Group to identify related risks and opportunities. The sustainability topics that are ranked highly in terms of significance of impact, the nature and magnitude of the risks and opportunities, or both, are prioritised.

We have affirmed that our key focus areas remain relevant to both the Group and our stakeholders, with no changes to the list of material topics from FY2024. The Group's Material Topics for FY2025, along with the climate-related risks and opportunities that correspond to them, are presented below:

| 0.0             |                              |                     |   |  |
|-----------------|------------------------------|---------------------|---|--|
| Material<br>— · | Impacts identified under GRI |                     | Climate-related risks and                             |  |
| Topics          | Summary of key impacts       | Summary of          | opportunities that could                              |  |
|                 |                              | management          | reasonably be expected to                             |  |
|                 |                              | approach            | affect KOPL's prospects                               |  |
| Environmenta    |                              | Ι                   | T   |  |

Opportunity Demand for green products and services, such as eco-friendly hospitality offerings, can create new revenue streams.      |

### **RISK MANAGEMENT**

At KOPL, we recognise the growing impact of EESG risks and opportunities on our business operations, financial performance and long-term sustainability. Our risk management framework integrates EESG considerations, including climate-related considerations, into our decision-making process to enhance resilience and adaptability.

The material factors identified by the Group can translate into a range of risks and opportunities. KOPL's EESG risk management framework is designed to systematically identify, assess and document material impacts, including but not limited to climate-related impact, risks, along with their key controls and mitigation measures.

With the intensifying global climate crisis, characterised by rising temperatures, extreme weather events, and shifting environmental regulations, businesses face greater challenges. To ensure that we remain relevant amid these changes, we have undertaken a climate-related scenario analysis to identify the most relevant climate change risks and opportunities for the Group. As part of our annual enterprise risk assessment exercise, EESG risks are evaluated alongside with other business risks to ensure that they remain within our risk appetite. With this systematic EESG risk management framework in place, the Group's capabilities in identifying and mitigating any risks, coupled with competencies are perpetually enhanced.

### PERFORMANCE HIGHLIGHT AND TARGETS

To track our performance and drive continuous improvement, we have established a set of targets for each Material Topic. Please refer to the section "Sustainability Performance Data" for detailed breakdown of all performance indicators for each Material Topic.

The table below shows our progress towards achieving previously set targets:

| Material Topics | Targets   | Our Performance in        |
|-----------------|---|---------------------------|
|                 |   | FY2025                    |
| Environmental   |   | I                         |
| Greenhouse Gas  | Short-Term Targets (1-2 years)  | Not achieved. Total       |
| Emissions &     | Reduce purchased electricity consumption by 2%.                       | energy consumption        |
| Energy          | Reduce energy intensities by 5%.                                      | intensity increased by    |
| Consumption     | Adopt use of higher energy efficient features and                     | 1,586% mainly due to the  |
|                 | fittings.   | increase in business      |
|                 | Medium-term Targets (by 2030)   | activity and the various  |
|                 | ■ Reduce CO <sub>2</sub> e emission intensities from Scope 1 and      | upgrading works carried   |
|                 | 2 emissions in absolute figures by 6%.                                | out in FY2025.            |
|                 | ■ Disclose more categories under Scope 3 emissions.                   |                           |
|                 | ■ Reduce energy intensities by 10%.                                   |                           |
|                 | Adopt more usage of energy efficient features and                     |                           |
|                 | fittings with two or more Minimum Energy                              |                           |
|                 | Performance Standards ("MEPS") stars.                                 |                           |
|                 | Long-term Targets (by 2050)   |                           |
|                 | ■ Perform a 2°C or lower scenario analysis with more                  |                           |
|                 | quantitative information to describe the potential                    |                           |
|                 | outcomes, taking into consideration a transition to                   |                           |
|                 | a lower-carbon economy.   |                           |
|                 | ■ Reduce GHG emission intensities by 10%.                             |                           |
|                 | ■ Reduce energy intensities by 15%.                                   |                           |
|                 | <ul><li>Achieve 50% of features and fitting that are energy</li></ul> |                           |

### THE ENVIRONMENT

We recognise our responsibility to minimise environmental impact and optimise resource efficiency across our operations. This section outlines our approach to energy consumption and water usage, key factors in our sustainability strategy.

#### Greenhouse Gas ("GHG") Emissions and Energy Consumption

#### **Impact on KOPL**

KOPL is exposed to both the physical risks caused by an increasingly unpredictable and extreme climate conditions, as well as the transition risks arising from societal and economic shifts towards a low-carbon future.

We recognise the impact of energy consumption and the associated GHG emissions on climate change. A heavy reliance on fossil fuels and high energy consumption can exacerbate energy poverty and increase expenses. On the other hand, reducing energy usage and integrating energy-efficient technologies across our operations can enhance sustainability while generating substantial cost savings for the Group.

#### **Management Approach**

#### Governance

Good corporate governance is central to executing the Group's sustainability strategy. KOPL's commitment to effective corporate governance on climate and sustainability-related matters is underpinned by the strong leadership and effective oversight by the Board and senior management of the Group.

The Board has ultimate responsibility for sustainability reporting and has integrated sustainability considerations into the Group's business and strategy. The Board is responsible for reviewing and approving the Group's sustainability policies, practices and performance disclosures. The Board conducts regular assessments of environmental trends and evaluates potential risks and opportunities associated with climate change to ensure effective oversight of strategic risk management. Refer to the "Sustainability Governance" section of this Report for further details.

#### Climate-related Risks and Opportunities

Recognising the significant energy and water consumption inherent in our business operations, we acknowledge our contribution to climate change and the broader implications for global warming. Therefore, we are committed to enhancing climate resilience across our business divisions. A foundational step in this journey is to identify and assess the potential risks and opportunities, as well as their financial impact on our businesses.

In FY2025, members of SSC participated in a series of physical and virtual engagements to revisit and update the climate-related risks identified in FY2024. Through our risk assessment, we have identified three priority climate-related risks and two key climate-related opportunities with the potential to affect our operational, strategic and financial performance.

#### **Group Strategy**

Clear communication of the Group's sustainability strategy allows our stakeholders to better understand how climate-related issues may affect our future performance. With the goal of keeping the global temperature rise below 1.5 degrees Celsius, as stipulated in the Paris Agreement, we have made it a top priority to tackle climate change within our EESG practice. As part of the Group's commitment to achieving the goals established by the Paris Agreement, KOPL has initiated the first

step to comprehend the impact of climate change on the Group's operations and explored potential risks and opportunities associated with climate-related factors

We seek to transform the Group into a climate-resilient and future-ready business. Our overarching climate strategy is to identify, assess, prioritise, mitigate, and monitor climate-related physical and transition risks in our business. Indonesia has not yet communicated an explicit net zero target but explores scenarios that could lead to net zero by 2060 or sooner in its long-term strategy submitted to the United Nations Framework Convention on Climate Change ("UNFCCC") in July 2021<sup>1</sup>. We also seek to capitalise on climate-related opportunities with the global shift to a lower-carbon economy progressively. We expect our strategies evolve to be more developed and refined as we progress with a deeper analysis of risks and opportunities over the coming years.

| Climate-rela                                       | ated Risks/ Opportunities             | Description  |
|--|---------------------------------------|--|
| Transition Risk                                    |                                       |  |
| Enhanced<br>emissions-<br>reporting<br>obligations | Risk Description                      | More stringent regulations and requirements concerning GHG emissions reporting pose a transitional risk to the Group, including obligations related to reporting as outlined in GRI Standards and TCFD recommendations.  |
|  | Impact of Risk                        | The evolving emissions-reporting regulations and obligations will lead to a rise in the indirect operating costs for the Group. This includes an increase in professional and consultancy fees, compliance cost, and administrative expenses to fill reporting requirements. |
|  | Strategic Response                    | The Group has been constantly monitoring regulatory requirements and assessing its capacity in meeting them.   |
|  | Potential Financial Impact (\$\$'000) | 47   |
| Increased cost of materials                        | Risk Description                      | Rising market demand and intensified competition could drive up the prices of housekeeping and maintenance supplies, as well as food, beverages, and other consumables within the Group.   |
|  | Impact of Risk                        | Higher material costs will increase the operating expenses, for instance procurement of food, beverages, cleaning supplies, and maintenance equipment.   |
|  | Strategic Response                    | The Group has diversified its supplier base by sourcing from China and has also ensured a reserve of raw materials to anticipate any potential delays caused by disruptions.   |
|  | Potential Financial Impact (\$\$'000) | 3,052  |
| <b>Physical Risks</b>                              |                                       |  |
| Rising mean temperatures                           | Risk Description                      | According to Climate Risk Country Profile of Indonesia published in 2021 <sup>2</sup> , warming in the range of 0.8°C–1.4°C is expected by the 2050s.  |

|---|----------|---------|----------------------------------|--|
| rise of 1°C may raise air conditioning usage, resulting in higher energy consumption and operating costs. Moreover, higher temperatures could induce physical strain and increase the risk of heat-related issues like exhaustion or heatstroke, consequently diminishing employee productivity.  Strategic Response  The Group has adopted the practice of keeping the office air conditioning at 24°C and turn it off before the end of the workday. Guest rooms are also preset at 24°C. Additionally, the Group has incorporated energy-efficient LED lighting to minimise heat output from lighting fixtures.  Potential Financial Impact (S5'000)  Risk Description  Climate Risk Country Profile of Indonesia estimated a modest sea-level rise of 10cm by 2030 and 21 cm by 2060.  Impact of Risk  Increasing sea levels have the potential to accelerate coastal erosion, heightening the risk of property damage or loss situated along the coastline. Additionally, rising sea level could degrade beach quality and limit guest accessibility. Consequently, the Group may experience higher maintenance expenses and a reduced profit margin.  Strategic Response  The Group made efforts to raise awareness among staff, guests, and the local community about the impacts of rising sea levels and the importance of coastal resilience through educational programs, signage, and outreach efforts. The Group will continuously monitor sea level rise, and adjust its strategies as needed to address evolving challenges.  Potential Financial Impact (\$5'000)  Opportunity - Resource Efficiency  Use of recycling  Impact of Opportunity  Potential Financial of the Group. #### Scenario Analysis

To understand and manage the potential impacts of climate change on our business, strategy, and financial planning, we have undertaken a climate scenario analysis to help us evaluate the resilience of our business under a range of plausible climate futures. This approach supports informed decision-making by considering both transition and physical climate-related risks under varying degrees of global warming. We leverage insights from research papers and industry studies, which allow us to explore the financial implications of climate risks and opportunities across different climate futures, and to evaluate the strategic resilience of our business model under each scenario. The Group's climate scenario analysis considers the following two scenarios based on the Intergovernmental Panel on Climate Change ("IPCC"):

- International Energy Agency's Sustainable Development Scenario<sup>3</sup> a best-case scenario
  where the global average temperature increases by less than 2°C ("Paris-aligned scenario");
  and
- IPCC Representative Concentration Pathway 8.5<sup>4</sup> a business as usual with no mitigation scenario where temperatures increase more than 4°C by the end of the century ("No mitigation scenario").

Our selected scenarios and the corresponding impact to our business is outlined below:

| Scenario    | Paris-aligned scenario<br>(Below 2°C)                            | No mitigation scenario<br>(4°C)   |
|-------------|--|---|
| Description | warming is limited to below 2°C, assuming rapid decarbonisation, | A high-emissions scenario where limited or no climate action is taken, resulting in a rise in global average temperature exceeding 4°C by 2100. |

<sup>&</sup>lt;sup>3</sup> "Net Zero Emissions by 2050 Scenario (NZE) – Global Energy and Climate Model – Analysis." IEA, www.iea.org/reports/global-energy-and-climate-model/net-zero-emissions-by-2050-scenario-nze.

<sup>4 &</sup>quot;IPCC AR5 Assessment Report" IPCC, https://www.ipcc.ch/reports/?rp=ar5

| Scenario    | Paris-aligned scenario<br>(Below 2°C)  | No mitigation scenario<br>(4°C)   |
|-------------|--|---|
|             | energy, and strong policy support for climate action.  | This assumes continued reliance on fossil fuels and weak climate policies.  |
| Rationale   | To evaluate the resilience of our business strategy under a low-carbon transition with increasing regulation, carbon pricing, and shifts in consumer and investor preferences.   | To assess the potential exposure to extreme physical risks such as heatwaves, sea-level rise, flooding, and supply chain disruptions in a scenario with severe climate impacts.   |
| Assumptions | <ul> <li>Global carbon neutrality by 2070</li> <li>Significant investments in clean technologies</li> <li>High carbon prices</li> <li>Lower physical risk exposure but high transition risks (policy, legal, market)</li> </ul>  | <ul> <li>Continued increase in global GHG emissions</li> <li>No significant climate policies or technological shifts</li> <li>Physical risks dominate (e.g., increased extreme weather events)</li> <li>Transition risks are minimal but physical damages are severe</li> </ul> |
| Impact      | <ul> <li>Increased operating costs due to energy transition (e.g. retrofitting buildings, switch to renewables)</li> <li>Increase in capital expenditure to comply with environmental regulations</li> <li>Revenue risk if assets are not ESG-compliant hence become less attractive to tenants/customers</li> </ul> | <ul> <li>Higher insurance premiums</li> <li>Greater property damage and increase in maintenance costs</li> <li>Operational disruption due to possible resort closures in the event of extreme heat or flooding</li> <li>Revenue loss from lower occupancy</li> </ul>            |

#### Metrics and Targets

In addition to our existing metrics and targets, we will continue to enhance our disclosures and ability to identify and measure emissions, working with our suppliers and customers, and exploring new ways in which we can use analytics, automation, and artificial intelligence to enhance decision making and transparency.

#### **Our Performance**

At KOPL, we remain dedicated to reducing our energy consumption and bolstering our energy efficiency. Our energy-saving initiatives are summarised as follow:

- Policies and guidelines on energy-efficient related and other certifications required by the local government;
- Policies and guidelines on green buildings or hotels with smart designs;
- Policies and guidelines on promoting an environmentally friendly corporate culture as well as raising awareness on environmental matters among our employees;
- Procurement policies and guidelines to prioritise the use of energy-efficient or environmentally friendly fixtures and fittings as well as products and equipment; and
- Provision of free shuttle services to and from the ferry terminal, which is planned strategically by the Front Office Team (i.e. determining which type of vehicle to use for different pick-up timings based on arrival and departure reports).

To implement the above, the STF is responsible for monitoring and managing the resorts' monthly energy consumption and promoting energy conservation efforts. The STF also monitors and performs trend analysis on the electricity and gas consumption to track energy usage.

Some of the key energy efficiency enhancements measures that have been put forth entail:

- Building resorts with a sustainable-centric interior design (i.e. being surrounded by extensive and lush amounts of greenery to reduce the degree of the urban heat island effect; creating open-air structures to alleviate the need for air-conditioning and artificial lighting);
- Employing sustainable materials like light-emitting diode (LED) lighting;
- Encouraging our employees to practise good energy-saving habits (e.g. switching off lights and air-conditioners when not in use);
- Equipping lifts with a sleep/standby mode when not in use, where lift car lighting, indicators, and ventilation will be turned off; and
- Pre-setting the temperature of the air-conditioning system at 24°C.

During the Reporting Period, the total energy consumed by the resorts is 7,306.66 GJ, or an energy consumption intensity of 0.14 GJ/ occupied room.

#### Diesel and Petrol Consumption and LPG (Scope 1 GHG emissions)

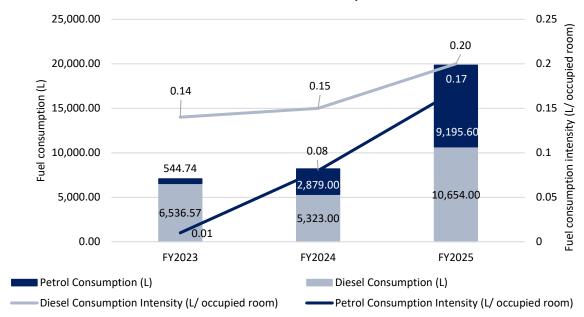

Total diesel consumption increased from 5,323.00 L in FY2024 to 10,654.00 L in FY2025 while, total petrol consumption increased from 2,879.00 L in FY2024 to 9,195.60 L in FY2025. Increase in diesel and petrol consumption is due to increased business activity in FY2025.

The 3-year comparison of fuel and the associated Scope 1 emissions data at KOPL are as follows:

| Performance Indicator                           | FY2023   | FY2024   | FY2025    |
|---|----------|----------|-----------|
| Energy consumption                              |          |          |           |
| Diesel consumption (L)                          | 6,536.57 | 5,323.00 | 10,654.00 |
| Petrol consumption (L)                          | 544.74   | 2,879.00 | 9,195.60  |
| Energy consumption intensity <sup>5</sup>       |          |          |           |
| Diesel consumption intensity (L/ occupied room) | 0.14     | 0.15     | 0.20      |
| Petrol consumption intensity (L/ occupied room) | 0.01     | 0.08     | 0.17      |

<sup>&</sup>lt;sup>5</sup> To enhance clarity and consistency in reporting, fuel consumption is now disclosed solely in L/ occupied room, instead of both L/ occupied room and L/ floor area. This simplification ensures a more direct comparison of intensities and is applicable for all intensity calculations in this Report.

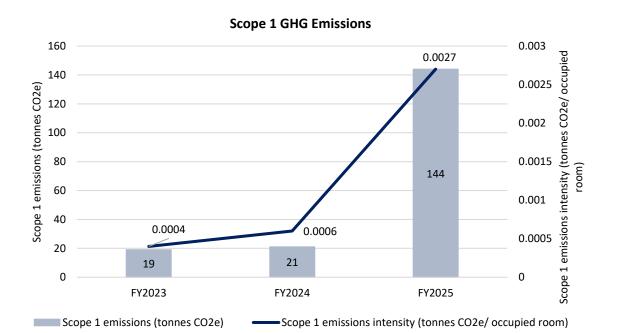

The liquefied petroleum gas ("LPG") consumed in FY2025 was 2,175.75 L.

There was an increase in direct GHG emissions from the consumption of diesel, petrol and LPG (Scope 1) emission from 21 tCO $_2$ e in FY2024 to 144 tCO $_2$ e in FY2025. Similarly, Scope 1 GHG emission intensity increased from 0.0006 tonnes CO $_2$ e/occupied room in FY2024 to 0.0027 tonnes CO $_2$ e/occupied room in FY2025. The increase was mainly due to the increase in business activity and the various upgrading works carried out in FY2025.

| Performance Indicator                                    | FY2023 | FY2024 | FY2025 |
|--|--------|--------|--------|
| Scope 1 GHG emissions                                    |        |        |        |
| Scope 1 emissions (tonnes CO₂e) <sup>6</sup>             | 19     | 21     | 144    |
| Scope 1 emissions intensity (tonnes CO₂e/ occupied room) | 0.0004 | 0.0006 | 0.0027 |

**KOP LIMITED** Sustainability Report FY2025

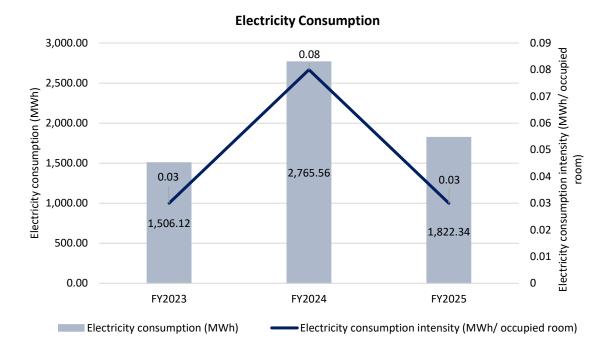

<sup>&</sup>lt;sup>6</sup> Scope 1 emissions are calculated based on the 2006 IPCC Guidelines for National Greenhouse Gas Inventories.

#### Electricity Consumption (Scope 2 GHG emissions)

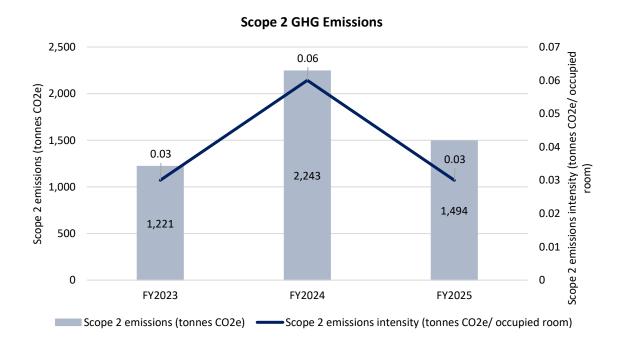

KOPL's overall electricity consumption for both resorts decreased from 2,765.56 MWh in FY2024 to 1,822.34 MWh in FY2025. Accordingly, the electricity intensity per occupied room decreased from 0.08 MWh/occupied room in FY2024 to 0.03 MWh/occupied room in FY2025. This decrease is mainly attributed to the segmentation of resorts, allowing lights to be switched off during the low season as well as use of solar-powered fixtures such as wall lighting and insect eliminators. Additionally, the replacement of air conditioners with more energy-efficient models also contributed to the reduction.

| Performance Indicator                                  | FY2023   | FY2024   | FY2025   |
|--|----------|----------|----------|
| Energy consumption                                     |          |          |          |
| Electricity consumption (MWh)                          | 1,506.12 | 2,765.56 | 1,822.34 |
| Energy consumption intensity                           |          |          |          |
| Electricity consumption intensity (MWh/ occupied room) | 0.03     | 0.08     | 0.03     |

The indirect GHG emissions from electricity purchased (Scope 2 emissions) decreased from 2,243  $tCO_2e$  in FY2024 to 1,494  $tCO_2e$  in FY2025. Scope 2 GHG emission intensity per occupied room decreased from 0.06  $tCO_2e$ /occupied room in FY2024 to 0.03  $tCO_2e$ /occupied room in FY2025.

| Performance Indicator                                     | FY2023 | FY2024 | FY2025 |
|---|--------|--------|--------|
| Scope 2 GHG emissions                                     |        |        |        |
| Scope 2 emissions <sup>7</sup> (tonnes CO <sub>2</sub> e) | 1,221  | 2,243  | 1,494  |
| Scope 2 emissions intensity (tonnes CO₂e/ occupied room)  | 0.03   | 0.06   | 0.03   |

<sup>&</sup>lt;sup>7</sup> Scope 2 emissions are calculated using the location-based methods based on the GHG emissions factor published by the Ministry of Energy and Mineral Resources.

#### **Water Consumption**

#### **Impact on KOPL**

Being part of the hospitality industry, KOPL requires a considerable amount of clean water to support the principal activities in the resorts - maintaining food and beverage establishments and executing general operations which include irrigation, cleaning, and maintenance. Overconsumption of water can drive up utilities cost and strain natural resources. Conversely, reducing water usage can lower operational expense and enhance resilience against potential water shortages.

#### **Management Approach**

We constantly strive to improve water efficiency and conserve water usage without compromising the satisfactory level of our guests and employees through the following initiatives:

- Implementing a water monitoring system to monitor water usage and highlight potential water leakages to improve water efficiency;
- Installing dual-capacity flushing cisterns to curtail water usage with each flush;
- Performing routine maintenance on the resorts' plumbing systems, swimming pools, water taps, and valves to prevent water leakages;
- Promoting water conservation habits to guests through the use of infographics that are placed at each wash basin;
- Replacing faulty taps and valves to minimise water loss; and
- Utilisation of recycled water (i.e. rainwater from rainwater harvesting) and sewage treatment plant ("STP") to treat wastewater making them suitable for safe discharge as well as reuse for non-essential purposes such as gardening, irrigation and general cleaning of office and public areas.

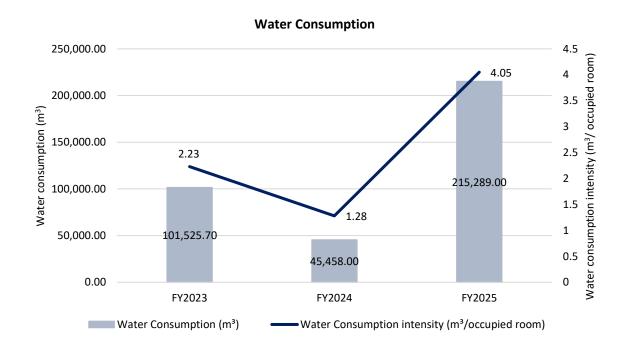

Specifically, MRN draws water from municipal water supplies and other public and private water utilities, whilst MRS's main source of water is groundwater from deep wells. Additionally, to extract and compute water consumption, the former uses invoices from public water utilities, while the latter is based on government calculations.

#### **Our Performance**

In FY2025, KOPL recorded a total water consumption of 215,289.00 m³, representing a 374% increase compared to 45,458.00 m³ in FY2024. This significant rise was primarily attributed to an isolated incident at MRN during the Reporting Period. A faulty pipe resulted in mud contamination of the resort's water tank, which necessitated multiple rounds of flushing and cleaning to ensure water safety and hygiene. This process involved filling and discharging large volumes of water, thereby temporarily inflating total consumption figures. Additionally, increased drainage of pool water due to upgrading works carried out in FY2025 also contributed to the rise.

Correspondingly, water intensity per occupied room increased from 1.28 m³/room in FY2024 to 4.05 m³/room in FY2025. Excluding this one-off event, underlying water usage remained generally stable, and operational controls continued to be implemented to encourage water efficiency. Looking ahead, we are reviewing our infrastructure maintenance protocols and investing in preventive measures to reduce the risk of similar incidents.

| Performance Indicator                           | FY2023     | FY2024    | FY2025     |
|---|------------|-----------|------------|
| Water consumption                               |            |           |            |
| Water consumption (m³)                          | 101,525.70 | 45,458.00 | 215,289.00 |
| Energy consumption intensity                    |            |           |            |
| Water consumption intensity (m³/ occupied room) | 2.23       | 1.28      | 4.05       |

### **OUR EMPLOYEES**

At KOPL, we recognise that employees, customers, and communities are the cornerstone of a thriving and sustainable organisation. We are committed to empowering our employees to reach their full potential and fostering their growth. Cultivating an inclusive and collaborative work culture is paramount to our approach, allowing us to deliver exceptional, customer-centric services.

We firmly believe that effective human capital management is essential for the long-term success of our business. Our employees are our greatest assets in delivering high-quality services to our guests. Therefore, we prioritise fair and merit-based employment practices that nurture a positive corporate culture. To support the well-being and professional development, we place emphasis on regular cross-departmental training programs and provide opportunities for continuous learning and growth.

As of 31 March 2025, there were a total of 376 employees (FY2024: 358 employees), of which, 249 were full-time employees, 69 were part-time employees and 58 non-guaranteed hours employees. Among our employees, there were 278 males (74%) and 98 females (26%), (FY2024: 255 males; 71% and 103 females; 29%). For detailed breakdown of our employees by gender, age group and employee category, refer to the section "Sustainability Performance Data" at the end of this Report.

#### **Talent Attraction and Retention**

#### **Impact on KOPL**

The Group understands that employee performance directly influences the quality of service delivered to our guests, which in turn impacts the resort's operations positively. Thus, we prioritise maintaining a secure and supportive work environment to enable our employees to excel. On the other hand, failure to attract and retain skilled employees may lead to productivity losses and operational inefficiencies.

#### **Management Approach**

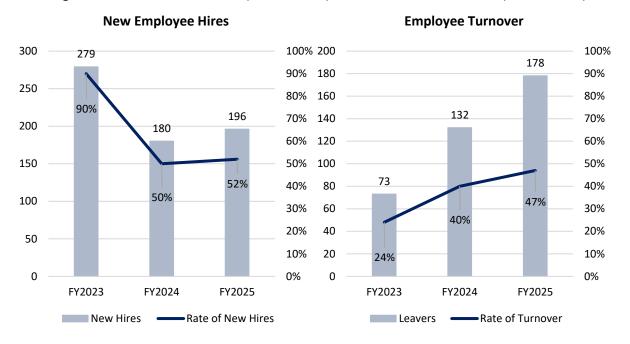

We uphold fair and merit-based employment practices to attract suitable candidates and retain current employees. The Group has established the Employment Handbook and various policies, including the Code of Conduct, as well as procedures for hiring, termination, and retirement.

Employee benefits encompass leave allowances, compensation packages, insurance coverage, and performance-based bonuses. Our compensation structures are designed to be equitable, commensurate with job requirements, qualifications, and experience. Recognising the importance of fair compensation, we regularly benchmark our packages against industry standards to ensure competitiveness. Furthermore, we strongly oppose any form of discrimination based on race, ethnicity, age, gender, or nationality. We also prioritise employee empowerment and development to drive business growth and resilience.

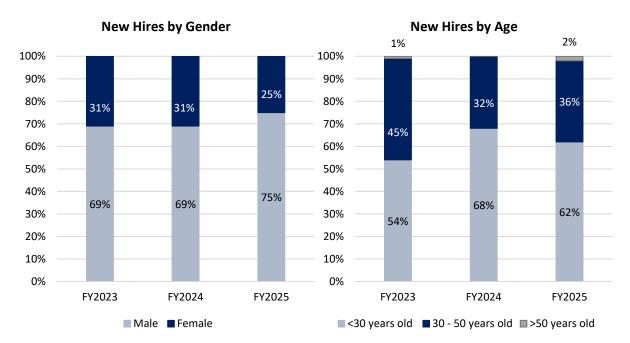

#### **Our Performance**

#### **New Hires and Turnover**

In FY2025, there were a total of 196 new hires and 178 leavers (FY2024: 180 new hires and 132 leavers), resulting in a rate of new hire<sup>8</sup> of 52% (FY2024: 50%) and a turnover rate<sup>9</sup> of 47% (FY2024: 40%).

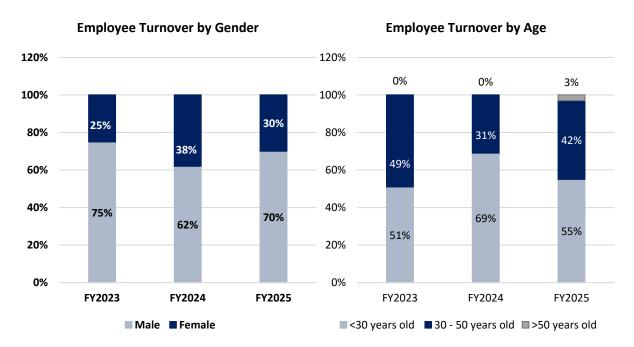

The breakdown of new hires by gender and age groups are as follows:

<sup>&</sup>lt;sup>8</sup> The rate of new employee hires during FY2025 was calculated by: Number of New Hires in FY2025 / Total workforce as of 31 March FY2025.

<sup>&</sup>lt;sup>9</sup> The rate of employee turnover during FY2025 was calculated by: Number of employees who left in FY2025 / Average number of employees in FY2024 and FY2025.

The breakdown of employee turnover by gender and age groups are as follows:

#### **Performance Evaluations**

Encouraging open communication between management and staff fosters a positive workplace culture. We recognise that annual/bi-annual performance evaluations support ongoing learning and development initiatives. To ensure that we provide fair and progressive opportunities for all our employees, we conduct an annual performance evaluation to identify development gaps and relevant training needs of our employees. Performance evaluations were conducted for 60% of our employees during the Reporting Period, as they are only carried out for contract staff.

#### **Training and Education**

#### Impact on KOPL

At the Group, we recognise that our success hinges on having a skilled team capable of achieving our business goals. Therefore, we are committed to nurturing the development of our employees through a diverse range of internal and external training initiatives, both at MRN and MRS. Each year, we ensure they acquire new skills, stay updated on industry trends, and complete relevant compliance training.

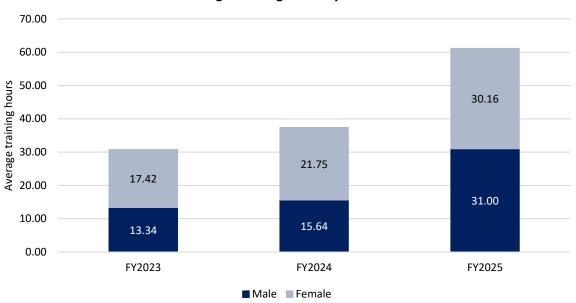

#### **Management Approach**

A well-trained and adaptable workforce enables us to proactively respond to evolving macroeconomic and operational landscapes. New employees undergo an orientation immersion programme to align with our mission, vision, core values, and corporate culture. To enhance customer service and career growth opportunities, we strongly encourage employees to learn a foreign language, tapping into their leadership potential and bolstering our competitive edge in the hospitality sector.

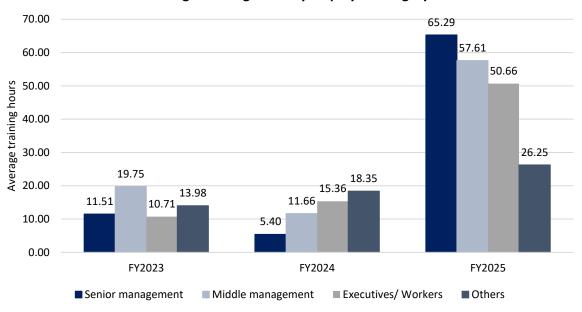

#### **Our Performance**

In FY2025, 64% of males and 50% of females (FY2024: 60% of males and 50% of females) underwent performance and career development reviews. The total number of training hours rose from 6,211.66 hours in FY2024 to 16,164.95 hours in FY2025. The average training hours per employee is 30.78 hours. This is a result of more frequent employee trainings held as part of efforts to help employees develop new skills and enhance existing ones. This leads to a higher work efficiency and better overall performance.

#### **Average Training Hours by Gender**

#### **Average Training Hours by Employee Category**

#### **Occupation Health and Safety**

#### **Impact on KOPL**

Prioritising occupational health and safety and reducing workplace incidents improve employee morale and productivity. Failure to prioritise and comply with health and safety regulations can lead to injuries or even fatalities among our employees.

#### **Management Approach**

The Group prioritises the well-being and safety of our employees, proactively implementing measures to cultivate a safety-conscious culture. Health and Safety Committees are established in both MRN and MRS, serving as platforms for management and employees to consult and promote workplace health and safety. Each resort maintains an Emergency Response Team, extensively trained in first aid and fire safety, responsible for ensuring the safety of employees and guests during emergencies.

General Managers and Security Officers conduct routine inspections of resort premises to identify potential health and safety hazards, promptly addressing any risks. We ensure compliance with safety protocols for lifts, escalators, and stairways across our resorts. Regular maintenance of kitchen appliances, plumbing, electrical systems, kitchen equipment, and generators is conducted to uphold safety standards for employees and guests. Additionally, first aid and fire safety training are mandatory components of our orientation and immersion program for all employees. Health and safety incidents reported to management are investigated, followed by corrective and preventive action plans to prevent future occurrences.

#### **Our Performance**

The following table shows the 3- year comparison of workplace incidents recorded:

| Performance Indicator   | FY2023 | FY2024 | FY2025 |
|---|--------|--------|--------|
| Total number of workplace incidents that result in a fatality                       | 0      | 0      | 0      |
| Number high-consequence work-related injuries (excluding fatalities)                | 2      | 0      | 0      |
| Rate of high-consequence work-related injuries (excluding fatalities) <sup>10</sup> | 0.62   | 0      | 0      |
| Number of recordable work-related injuries  | 2      | 5      | 1      |
| Rate of recordable work-related injuries <sup>11</sup>                              | 0.93   | 2.22   | 0.43   |
| Number of recordable work-related ill-health cases                                  | 5      | 0      | 1      |

We have successfully achieved our target by maintaining zero workplace-related fatalities recorded at MRN and MRS as well as no incident of non-compliance with relevant health and safety protocol. During the Reporting Period, we recorded one work-related injury. An employee at MRN received a cut while cleaning the pool. In a bid to minimise workplace injuries, the Group has begun conducting regular safety trainings, covering topics such as safety prevention guidelines and workplace hazard identification. Employees are reminded to be standing lower or at eye level when cleaning the pool to prevent loss of balance. The Security Team has also started to report potential hazards identified during their regular security patrols around the resort. Other measures such as putting up signs in areas of potential danger (e.g. slippery floors, etc.) and regular checks on safety equipment has also been implemented to minimise workplace injury.

<sup>&</sup>lt;sup>10</sup> Rate of high-consequence work-related injuries (excluding fatalities) = [Number of high- consequence work-related injuries (excluding fatalities) / Number of hours worked] x 200,000.

<sup>&</sup>lt;sup>11</sup> Rate of recordable work-related injuries = [Number of recordable work-related injuries / Number of hours worked] x 200,000.

We recorded one work-related ill-health case where an employee at MRS fainted due to dehydration while coaching a boxing class. All work-related accidents and injuries are recorded, and the cause of the incident/ accident has been investigated. Employees are reminded to stay hydrated, especially on hot days, and that they should see a doctor and not report to work if they are unwell. Actions had also been taken to prevent similar accidents from happening again.

#### **Employee Benefits and Wellness**

#### **Impact on KOPL**

A cohesive workforce fosters a culture of trust and integrity within the Group. As such, we constantly align our benefits and welfare practices with the local employment and labour laws.

#### **Management Approach**

KOPL is committed to fostering a safe and cohesive community where employees, their families, and neighbours live and work harmoniously. We utilise our resources and platforms to provide support to local communities and advocate for those in need.

#### **Our Performance**

Through the active engagement of our employees and the resources we contribute, we aim to improve the well-being of various communities, promote positive social change, and create value for our stakeholders and society.

In FY2025, apart from basic compensation and annual leave entitlement, we provide welfare benefits such as monthly menstrual, maternity and paternity leave. Moreover, our employees are entitled to other benefits such as transportation, meal, mobile, housing, bereavement, festive, home leave, marriage, dental and medical allowances, we also provide our employees and their visiting families and friends with discounted rates on food, beverages, and room prices at our resorts, depending on the employee's position.

#### **Community Involvement**

#### **Impact on KOPL**

KOPL recognises that supporting local communities help cultivate goodwill and strengthen stakeholder relationships. However, if not managed effectively, it may lead to challenges such as high costs with uncertain financial benefits or initiatives that do not align with community needs.

#### Management Approach

We believe that we have a responsibility to integrate social responsibility as part of our business strategies and goals for the betterment of the community. We achieve this by empowering the less fortunate in our community through donations and activities to support the local communities in which we operate in. KOPL remains committed to expanding its involvement in various corporate social responsibility initiatives to continue making a positive impact on the local community.

#### **Our Performance**

In FY2025, MRS conducted a mangrove reforestation activity with Kelompok Nelayan Wanasari Community in Kampoeng Kepiting. In collaboration with the local district government, MRS participated in providing gift packages for competitions held in celebration of National Children's Day. MRS also made donations to SOS Bali in support of the World Hunger Day campaign, and Eben Haezer Orphanage. During the Reporting Period, MRN collaborated with the local community, Padang Tak Jemu to donate books and laptops to the local Christian and Muslim orphanages.

### **OUR GUESTS**

#### **Customer Health and Safety**

#### **Impact on KOPL**

At KOPL, we strongly believe that forging and maintaining a good relationship with our guests is essential to our sustained business success and resilience. As such, creating a secure and safe environment for all our guests during their stay with us is our utmost priority. The provision of a pleasant and favourable experience for our guests will enhance their overall satisfaction and trust in our resorts.

#### **Management Approach**

As operators of the resort, all incidents reported by our guests are promptly investigated and addressed to prevent their recurrence and ensure a pleasant stay for everyone. Furthermore, if any of our guests fall ill during their stay, we shall promptly arrange for them to receive medical attention from doctors and healthcare professionals. Additionally, we provide a "Get-Well-Soon" care package, which includes a complimentary meal, as a gesture of goodwill for our guests to recover quickly.

In addition to implementing safety measures throughout our resorts, we conduct regular safety inspections to minimise potential health and safety risks for our guests. We have also established safety protocols and mitigation measures for identified hazards within our operating environment. Monthly maintenance ensures that our fire safety systems, including fire extinguishers and alarms, are fully functional. Moreover, fire safety audits and drills are conducted bi-annually to prepare our resorts for emergencies. Notably, at MRN, each villa is equipped with a resort map displaying escape routes and assembly points, while evacuation route maps are available throughout the premises at MRS.

#### **Our Performance**

In FY2025, there were no incidents (FY2024: zero) of non-compliance with relevant customer health and safety laws as well as regulatory requirements concerning health and safety at our resorts.

### **GOVERNANCE**

At KOPL, we uphold a strict stance against corruption and non-compliance. The Board and Management are fully committed to upholding elevated ethical standards and following optimal practices in corporate governance to ensure the enduring sustainability of the Group. With a strong ethical framework established at the highest levels, our objective is to generate value for our stakeholders and foster a solid, ethical corporate culture. Guided by the Code of Corporate Governance, the Group implements various sustainability initiatives to embed best practices of governance across its operations. Additionally, we are dedicated to operating in full compliance with all pertinent laws and regulations governing our business.

#### **Ethics and Business Conduct**

#### **Impact on KOPL**

We are committed to upholding the highest standards of ethics and conducting our business with integrity as we believe that it is fundamental for the business' success. We are strongly against any form of corruption and have implemented various procedures to address and mitigate the risks of bribery and corruption within the Group.

#### **Management Approach**

We have formulated an Employee Code of Conduct which outlines policies on anti-corruption to guide our employees in making responsible decisions. This framework strictly prohibits bribery and the giving or receiving excessive gifts and entertainment. To further support ethical behaviour, we have implemented a whistle-blowing policy that provides employees with secure and confidential channel to raise concerns of malpractice or any suspicion of fraudulent or unethical practices. All reported cases are timely and thoroughly investigated under strict confidentiality to promote transparency and accountability within the Group.

#### **Our Performance**

There were no incidents of non-compliance with anti-corruption laws and regulations in FY2025 (FY2024: zero).

#### **Compliance with Laws and Regulations**

#### **Impact on KOPL**

We recognise that robust corporate governance is vital for KOPL's reputation, performance, and fulfilment of sustainability goals, and ultimately, profitability.

#### **Management Approach**

Our primary goal is to maintain full compliance with all applicable regulatory requirements. Recognising that any breach could adversely affect our business operations and reputation, we have taken proactive measures to mitigate such risks. We engage external legal advisors and tax consultants on an ad-hoc basis to assist with legal and regulatory compliance.

#### **Our Performance**

There were no incidents of non-compliance with socioeconomic laws and regulations in FY2025 (FY2024: zero).

### **ECONOMIC**

#### **Economic Performance**

#### **Impact on KOPL**

At KOPL, our economic performance reflects our commitment to sustainable growth, financial resilience, and long-term value creation for our stakeholders. A strong economic position enables meaningful sustainability initiatives, whereas limited financial resources may result in reduced spending and a shift in priorities away from sustainability efforts.

#### **Management Approach**

KOPL is targeted to achieve sustainable improvement in our economic performance by managing and expanding our portfolio. We invest strategically, taking into consideration financial and environmental, social, and governance criteria in the evaluation process.

#### **Our Performance**

The table below shows the economic highlights of KOPL's performance for FY2025:

| Economic highlights (S\$'000) |                                  |          |  |
|-------------------------------|----------------------------------|----------|--|
|                               |                                  | FY2025   |  |
| Revenue/ Economic             | value generated                  | 69,676   |  |
| Profit before Incom           | e tax                            | 1,556    |  |
| Profit for the year           |                                  | 998      |  |
| Economic Value                | Operating costs                  | (76,696) |  |
| Distributed                   | Employee wages and benefits      | (6,624)  |  |
|                               | Payments to providers of capital | (323)    |  |
|                               | Payments to government           | (1,509)  |  |
|                               | Community Investments            | (59)     |  |
| Economic value retained       |                                  | (15,535) |  |

To understand more about our economic performance, please refer to Financial Statements of the Annual Report for FY2025.

### **SUSTAINABILITY PERFORMANCE DATA**

At KOPL, we are committed to transparency and accountability in tracking our sustainability progress. This section presents key sustainability performance data, providing insight into our EESG impacts. The 3-year comparison of our sustainability data is as follows:

| Performance Indicator                                 | FY2023     | FY2024    | FY2025     |
|---|------------|-----------|------------|
| Environmental   |            |           |            |
| Fuel consumption                                      |            |           |            |
| Diesel consumption (L)                                | 6,536.57   | 5,323.00  | 10,654.00  |
| Petrol consumption (L)                                | 544.74     | 2,879.00  | 9,195.60   |
| LPG (L) <sup>12</sup>                                 | -          | -         | 2,175.75   |
| Purchased electricity                                 |            |           |            |
| Electricity consumption (MWh)                         | 1,506.12   | 2,765.56  | 1,822.34   |
| Total energy consumption (GJ)                         | 257.01     | 290.21    | 7,306.66   |
| Energy consumption intensity (GJ/ occupied room)      | 0.01       | 0.01      | 0.14       |
| Total GHG emissions (tCO₂e)                           | 1,240      | 2,264     | 1,638      |
| Scope 1 GHG emissions (tCO₂e)                         | 19         | 21        | 144        |
| Scope 2 GHG emissions (tCO₂e)                         | 1,221      | 2,243     | 1,494      |
| Total GHG emissions intensity (tCO₂e/ occupied room)  | 0.00       | 0.06      | 0.03       |
| Scope 1 GHG emissions intensity (tCO₂e/occupied room) | 0.0004     | 0.0006    | 0.0027     |
| Scope 2 GHG emissions intensity (tCO₂e/occupied room) | 0.00       | 0.06      | 0.03       |
| Total Water Consumption (Cu M)                        | 101,525.70 | 45,458.00 | 215,289.00 |
| Water consumption intensity (Cu M/ occupied room)     | 2.23       | 1.28      | 4.05       |
| Social  |            |           |            |
| Total employees (as of 31 March)                      | 310        | 358       | 376        |
| Gender diversity                                      |            |           |            |
| Male employees (as of 31 March)                       | 217 (70%)  | 255 (71%) | 278 (74%)  |
